

# GE Dmr Plus analog Mammography

SKU: MP15292

Categories: [Analog Mammogram](#)

## Description

GE Senographe DMR Plus offers the patient a hands free compression exam with compression paddles, has 5 photocells for a wider range of breast placement, digital angulation display, and vertical height adjustment to allow more interaction with the patient, a two Patient Bucky's measuring 18x24 and 24x30 come standard, as does dual footswitch providing easy operation for the technologist. The machine boasts superb image quality with its Maxi Ray x-ray tube and the SharpIQ grid system for cleaner images. It employs a unique, patented bi-metal Mammography tube with a Rhodium track for superior imaging of the most challenging breast tissues. Over the years, GE's Senographe series has set the performance standards by which all other Mammography systems are measured. Our engineers have developed one innovation after another, advancing the state of the science - and firmly establishing Senographe as the world leader, with the largest Mammography installed base. Their latest contribution is the development of the Senographe DMR+. Based on a legacy of image quality leadership, plus innovation. New user friendly features such as 5 photocells for a wider range of breast placement, to digital angulation display, hands-free compression, and vertical height adjustment allow more interaction with the patient.
