

Hologic Lorad M-IV analog Mammography

SKU: MP15298

Categories: [Analog Mammogram](#)

Description

The Lorad MIV Mammography Systems revolutionary HTC grid reduces scatter in two directions, resulting in better contrast for dramatically improved image quality. Exclusive FAST paddle ensures more uniform compression also improving image quality and greater patient comfort. And best of all, the Lorad M-IV Series offers the industry's most comprehensive upgrade path from screening Mammography to stereotactic breast biopsy and full field digital imaging.
