

Oxygen concentrator

SKU: MP20121

Categories: [Equipments](#), [Patient Monitoring](#)

Short Description:

SKU: MP20121

The Respiroics EverFlo Q is a Home Oxygen that delivers up to 5 LPM of continuous flow oxygen in a quiet unit that weighs around 31 pounds. The design features of the EverFlo combine quiet operation, compact design and low maintenance into a single unit. It delivers around 90 to 96 percent of oxygen concentration with liter flows that range from 0.5 to 5.

The stylish, compact design allows it to fit easily into any room without being an eyesore. It also features 4 wheels on the bottom of the machine that make it easy to move around in any setting. At an operating noise level of 40 decibels, it is as quiet as most normal household appliances.

The EverFlo oxygen concentrator produces less heat than other home concentrators and requires less electricity to operate, reducing your operating costs. There are only 2 filters to replace, so there is minimal maintenance required on this unit.
