Categories: [Abdominal belt](#)

Description

Are you suffering from lower back pain? Then Tynor LS Belt Lumbopore is an ideal product to maintain the lumbar and sacral regions in the neutral position to relieve low back pain syndrome. Also used for the problems like lumbar spondylitis, spondylolisthesis, intervertebral disc syndrome, the osteoporotic pain of the lumbar spine, degenerative changes of the lumbar spine, postural fatigue, postural deformities and mechanical stresses due to poor posture. The anatomical design ensures perfect fitting around the waist, effective immobilization and enhanced patient comfort. Pre-shaped semi-rigid splints ensure a strong immobilization and perfect posture. Made from monofilament stripped elastic which is, light in weight, highly porous and has a strong compression. It has double pull elastic mechanism provides extra compression & firm grip to the L.S. region. Broad hook-loop panel facilitates in perfect fitting and adjustment of the belt around the waist, easy application and removal. Use this product under guidance of a qualified doctor. Remove, customize and reinsert the splint for comfortable immobilization. Some product care instructions are hand wash with mild detergent, do not dry clean, iron and bleach. Available in six sizes small, medium, large, XL and XXL.
