

Tynor Universal Shoulder Immobilizer (70-100 Cm)

SKU: MP25898

Categories: [Shoulder Immobilizer](#)

Description

Universal Shoulder immobilizer is one of the most commonly used designs to immobilize and support the dislocated shoulder. This is also used in the fractures of clavicle bone and the shoulder joint where immobilization of the region is required. Two piece design : Offers better immobilization, comfortable, easy application and removal. Made of 3 layered pu bonded fabric : Durable and non-tearable, plush looks, wrinkle free and soft to feel.
