

Tynor Patellar Support - Universal

SKU: MP25941

Categories: [Knee Support](#)

Description

Patellar support is designed to lift the patella and alleviate symptoms of pain, inflammation and discomfort associated with knee degeneration, without restricting circulation. Anatomical pad design : Lifts and positions the patella properly, optimal compression of the patellar tendon and ensures strong grip of the product. Silicon material of pad : Absorbs all the vibrations around the patella and the patellar tendon, provides comfortable compression to the patellar tendon and support the patella. Nodular surface : Proprioception, provides good massage, enhances blood circulation to the area and enhances healing. Reverse buckle design : One size fits all, provides customized compression and easy to wear.
