

Tynor Walker Boot - Large

SKU: MP25950

Categories: [Splint](#)

Description

Tynor Walker Boot is designed for rehabilitation after injury, fracture, sprains or surgery of foot, ankle or lower leg. The boots provide support to the ankle and leg without inhibiting mobility. They can be a substitute for cast or can be used in case of early cast removal. With a wider rocker bottom, these boots promote a natural gait, reduced plantar pressure, enhanced stability and comfort to the lower leg.
