SKU: MP26014

Categories: [Brace](#)

Description

Leg traction brace is a traction halter applied to the leg for below knee traction. It offers a distinct advantage of a very large holding surface area, ease of application and removal, reuse and patient comfort. Three-layered PU bonded fabric offers : Soft feel and plush looks through the top layer, comfortable cushioning through the middle, polyurethane layer and inner layer provides good frictional characteristics. Multiple hook loop closures : Ensure controlled compression, no loosening, less monitoring, easy application and removal. Large skin contact area : Ensures no vaso-constriction, eliminates need of an adhesive, convenient and quick to apply, ensures no skin peeling and Ideal for weak or geriatric skins.
