

BIPOLAR FORCEPS 5MM

SKU: MP35586

Categories: [Forceps](#)

Description

The unique design of the silver alloy tips includes a proprietary technology that reduces the molecular bonding force and helps eliminate hot spots on the silver alloy forcep tips

Features:

Available in a wide variety of tine lengths and tip style Prompt coagulation with low thermal spread, leading to less collateral damage to surrounding tissue Highly pure silver alloy instrument that eliminates sticking of tissues to bipolar forceps Guide-stops for alignment of tines to eliminate scissoring of tips
