Celbrea APP

Breast Cancer is the leading cause of death in less developed countries and the second leading cause of death in women in the U.S. Despite these staggering statistics, there is little women can do to proactively take care of their breast health.

The Celbrea App will be an educational tool that will enable women to register events and variables crucial to their breast health.

The Celbrea App will help by offering one more tool in the fight against this crucial disease.
