Rescue Ready RetroFit Fire Escape Ladder

- Rescue Ready RetroFit has an adjustable length. This unique feature enables you to fit the ladder to most windows, as well as adjust the height of the first rung.

- The ladders are made from durable 5052 aluminum and nylon webbing, and have been quality tested to meet and exceed ASTM Standard F2175.
- Engineered standoffs keep the rungs set off of the building, allowing a place for your hands and feet to rest, providing an easier descent.
- The Anti-Slip rungs provide secure footing.
- Rescue Ready RetroFit is permanently installed and secured to the structural components of your home.
- Installation is not difficult. If you can install a flat screen TV, you can install our ladder and its hardware.
- Rescue Ready RetroFit will fit most egress windows.
- Rescue Ready RetroFit will be stored in a decorative cover and appear to be part of the window trim. The ladder will always be exactly WHERE you want it, WHEN you need it most.
- Rescue Ready RetroFit is engineered to fit most windows, but unfortunately not ALL windows. Currently the cover only comes in one size, 46". This will work on most bedroom windows ranging from 28"-38".

Rescue Ready – “As Seen on Shark Tank” – Window Fire Escape Ladder System

- Rescue Ready will be stored in a compartment located in the bottom of the window frame. A decorative cover will hide the ladder when not needed, but provide easy identification in the case of an emergency.
- Rescue Ready is permanently installed and attached to the structural components of your home.
- Installation is done when the windows are installed, typically by the framing contractor building your home.
- The ladders are made from durable 5052 aluminum and nylon webbing, and have been quality tested to meet and exceed ASTM Standard F2175.
- Engineered standoffs keep the rungs set off of the building, allowing a place for your hands and feet to rest, providing an easier descent.
- The Anti-Slip rungs provide secure footing.
