

Equinox Pulse Oximeter EQ-OP-109

SKU: MP37959

Categories: [Fingertip Pulse Oximeter](#)

Description

Equinox Pulse Oximeter EQ-OP-109 is very useful device to determine oxygen saturation (SpO₂) of a patient's blood and pulse rate. This lightweight and compact device can be easily operated by inserting one fingertip into photoelectric sensor for diagnosis of the pulse rate and oxygen level in your body. The results will appear on the color OLED display. It is useful for patients with Asthma, Acute Respiratory Infection, COPD, Congestive Heart Failure (CHF), COVID-19 (Coronavirus) facing respiratory distress and other conditions. The normal range for Blood Oxygen Saturation is 70-99.9% and normal resting range for pulse rate is typically between 30-250 beats per minute. Fingertip pulse oximeter can be used by adults and paediatric patients in hospitals, hospital-type facilities, clinics and home.

- Easy-to-operate
- Accurate results of blood oxygen saturation and pulse rate
- Displays perfusion index percentage
- Anti-ambient light interference and anti-motion technology
- Display: colour OLED
- Low power consumption and battery indicator
- 360 degree screen rotation. 4-Directional view

Batteries : 2 AAA batteries required. (included) Product Dimensions : 3.6 x 3.4 x 5.8 cm; 54 Grams
