### THE LIGHTEST SLEEP OXYGEN MONITOR

FDA listed, the Wrist Sleep Oxygen Monitor comes with a clinically-proven & medical level high resolution sensor. It continuously tracks blood oxygen saturation levels, heart rate and movement, and records data at every 4 seconds during your sleep. Ideal for tracking CPAP treatments.

[/vc\_column\_text][vc\_column\_inner][vc\_column\_inner width="1/3"][vc\_column\_text]

### IMPROVE PEACE OF MIND

The Adjustable Vibration Alarm triggers when a low oxygen level is present. Set the threshold on the app and adjust 5 intensity level alerts. The vibration will gently wake you to remind you to change sleep position in order to breathe well again. Effective at reducing the risk of sleeping on a low and unhealthy blood oxygen level. It acts as a safety net for CPAP failure and is also optimal when not using CPAP.

## COMFORTABLE MONITOR WITH PATENTED FINGER RING SENSOR

The Oxygen Saturation Monitor comes with the patented Finger Ring Sensor to free your finger from the common constraining clips of more traditional fingertip pulse oximeters.

[/vc\_column\_text][vc\_column\_inner][vc\_column\_inner width="1/3"][vc\_column\_text]

## FREE MOBILE APP

For smartphones and tablets. Compatible with Android 5.0+ and iOS 9.0+. It provides reports to help you gain valuable insight into the patterns of your sleep.

The Smart Vibrating Sensor May Help Reduce The Risk of Sleeping On Low Blood Oxygen Saturation Levels

If your blood oxygen saturation level drops below a preset threshold, the user will receive a gentle

vibration on their finger that indicates he or she needs to shift their sleeping position in order to improve breathing. This helps to reduce the risk of sleeping on low and unhealthy blood oxygen levels, which can lead to various side effects. It also helps to minimize disturbing your sleep partner. (Disclaimers: This product is for general wellness use only and is not intended to diagnose or treat any disease. Please always consult your doctor for any medical concern.)

The Patented Finger Ring Sensor Will Free The Fingers From The Constraining Clip of More Traditional Fingertip Pulse Oximeters

The Lookee® Wrist Sleep Monitor tracks blood O2 saturation levels, heart rate and motion. The wristband sleep tracker features the patented Finger Ring Sensor which frees your finger from those constraining clips of more traditional fingertip pulse oximeters.

Sync Data to APP and Real Time Monitoring

Sync Data to App:

After monitoring, take the device off and the green light will remain on for a couple seconds as it saves the data. You will then see the blue light flashing, which means the device is ready to sync data to your mobile device. Turn on the App to sync the data. After the download is completed, you can check your sleep report on the App.

Check Real Time O2 Level and Heart Rate:

When you wear the Lookee Sleep Monitor, press the button on side to turn it on. Then open your App from your mobile device. Your App will connect to the monitor automatically. Check the Dashboard to see real time oxygen levels and heart rate.

(Disclaimer: This product is not a medical device and should not be used to diagnose or treat any medical condition.)
