

ACQUITY UPLC Xevo TDS micro IVD System

SKU: MP41002

Categories: [Laboratory Infrastructure](#)

Short Description:

1 Compact Design 2. Rapid, reliable and reproducible quantitative data for the clinical laboratory 3. Robust performance for reproducible detection of analytes at low level in complex biological liquid sample matrices 4. Clinical laboratories have access to the selectivity, sensitivity and versatility of LC-MS 5. Confidence to quantify more analytes using high acquisition rates 6. Reduces complexity and maximizes throughput and uptime 7. The system is controlled by Mass Lynx IVD System

Description

ACQUITY UPLC Xevo TDS micro IVD System Features 1 Compact Design 2. Rapid, reliable and reproducible quantitative data for the clinical laboratory 3. Robust performance for reproducible detection of analytes at low level in complex biological liquid sample matrices 4. Clinical laboratories have access to the selectivity, sensitivity and versatility of LC-MS 5. Confidence to quantify more analytes using high acquisition rates 6. Reduces complexity and maximizes throughput and uptime 7. The system is controlled by Mass Lynx IVD System
