

Biocard Rapid Test for Hepatitis B Surface Antigen

SKU: MP41049

Categories: [Laboratory Infrastructure](#)

Short Description:

Biocard™ Rapid test for HBsAg rapid test is an Antigen sandwich immunochromatographic lateral flow test for the qualitative detection of Hepatitis B Virus surface antigens. All the accessories needed for the sampling and testing are included. Works on Serum/Plasma. Results can be obtained in 20 minutes.

Description

Biocard™ Rapid test for HBsAg rapid test is an Antigen sandwich immunochromatographic lateral flow test for the qualitative detection of Hepatitis B Virus surface antigens. All the accessories needed for the sampling and testing are included. Works on Serum/Plasma. Results can be obtained in 20 minutes. Features

- Sample Type: Serum/Plasma.
- Ability to detect All known 11 subtypes of HBsAg by Antigen sandwich.
- Convenient pack sizes.
- Simple to perform.
- Results can be obtained in 20 minutes.
- Needs no equipment.
- Excellent sensitivity and specificity.
- Convenient storage between 4-30°C.
- ISO -13485 2012 and GMP compliant manufacturing process.
