

Biocard HIV 1 & 2 Flow Through Assay Kit

SKU: MP41054

Categories: [Laboratory Infrastructure](#)

Short Description:

Biocard™ Rapid HIV 1 and 2 flow through assay kit on Flow through assay method for differential detection of HIV 1 & 2 antibodies along with a in built procedural control. All the accessories needed for the sampling and testing are included. Works on Serum/Plasma Results can be obtained in 5 minutes

Description

Biocard™ Rapid HIV 1 and 2 flow through assay kit on Flow through assay method for differential detection of HIV 1 & 2 antibodies along with a in built procedural control. All the accessories needed for the sampling and testing are included. Works on Serum/Plasma Results can be obtained in 5 minutes Features

- Sample Type: Human serum/Plasma
- Ability to differentially detect HIV 1 & 2 antibodies by flow through assay method along with in built procedural control.
- Convenient pack sizes.
- Simple to perform.
- Results can be obtained in 5 minutes.
- Needs no equipment.
- Excellent sensitivity and specificity.
- Convenient storage between 4-30°C.
- ISO -13485 2012 and GMP compliant manufacturing process.
