

Biocard Malaria PfPan Antigen

SKU: MP41056

Categories: [Laboratory Infrastructure](#)

Short Description:

Biocard™ Malaria Pf/PAN antigen diagnostic kit is a pLDH Antigen capture test kit for differential detection of Malaria P.falciparum and PAN Malarial species by pLDH antigen capture method. All the accessories needed for the sampling and testing are included. Works on Human Whole blood. Results can be obtained in 20 minutes.

Description

Biocard™ Malaria Pf/PAN antigen diagnostic kit is a pLDH Antigen capture test kit for differential detection of Malaria P.falciparum and PAN Malarial species by pLDH antigen capture method. All the accessories needed for the sampling and testing are included. Works on Human Whole blood. Results can be obtained in 20 minutes. Features

- Sample Type: Human Whole blood.
- Ability to differentially detect P.falciparum and non P.falciparum infections by antigen capture assay in Human whole blood.
- Convenient pack sizes
- Simple to perform
- Results can be obtained in 20 minutes
- Needs no equipment
- Excellent sensitivity and specificity.
- Convenient storage between 4-30°C.
- ISO -13485 2012 and GMP compliant manufacturing process.
