

# BIOCARD Rapid Test kit for AntitTG IgA

SKU: MP41065

Categories: [Laboratory Infrastructure](#)

## Short Description:

Biocard rapid test for determination of anti-tTG IgA in whole blood is a rapid test kit based on lateral flow immunochromatography method for qualitative detection of IgA antibodies to tTG. All the accessories needed for the sampling and testing are included. Works on Serum/Plasma and Whole Blood. Results can be obtained in 20 minutes.

## Description

Biocard rapid test for determination of anti-tTG IgA in whole blood is a rapid test kit based on lateral flow immunochromatography method for qualitative detection of IgA antibodies to tTG. All the accessories needed for the sampling and testing are included. Works on Serum/Plasma and Whole Blood. Results can be obtained in 20 minutes.

- Sample Type: Serum/Plasma and Whole Blood.
- Detects the IgA antibodies to tTG (tissue transglutaminase) by lateral flow technique with great sensitivity and specificity.
- Convenient pack sizes
- Simple to perform
- Results can be obtained in 20 minutes
- Needs no equipment
- Excellent sensitivity and specificity.
- Convenient storage between 4-30°C.
- ISO -13485 2012 and GMP compliant manufacturing process.
