

# Hemodialysis Machine

SKU: MP41090

Categories: [Dialysis Machine](#)

## Short Description:

- Sleek Design
- Operative Panel
- Less Power Consumption per Dialysis
- Low Disinfection Consumption
- Patient data storage
- Additional NIBP measurement

## Description

Nikkiso DBB 27 Hemodialysis Machine for Acetate/Bicarb dialysis/volume controlled UF and conductivity profiling with 12 .1 inch touch screen operative panel with built-in Patient storage facility. Benefits

- More cost saving per sq.ft.
- Less consumption of electricity
- Safety: clinically benefitted because of BP linked with UF signals -Safety
- Simple operation
- Needs only less maintenance
- Easy to access critical internal components
- Easy to check the hydraulic parts action
- Self test history
- Operation history
- Reminder of preventive maintenance kit replacement period

## Features

- Sleek Design
- Operative Panel
- Less Power Consumption per Dialysis
- Low Disinfection Consumption
- Patient data storage

- Additional NIBP measurement
