

# Multihance

SKU: MP41146

Categories: [Imaging](#)

Short Description:

One Stop Shop MRI Contrast Agent. A Gadolinium BOPTA molecule having Double relaxivity and Dual route of elimination.

## Description

One Stop Shop MRI Contrast Agent. A Gadolinium BOPTA molecule having Double relaxivity and Dual route of elimination. Benefits

- Due to its double relaxivity Multihance gives more information at same dose, or similar information at lesser dose compared to competitor brands.
- Due to its hepatobiliary excretory capability, Delayed Liver Imaging (up to three hours after administration) is possible, for studying liver pathologies.
- No contraindication for use in high risk patient groups with reduced renal function

## Features

- Double relaxivity agent
- Additional Hepatobiliary excretion in addition to renal excretion.
