Description

- The Romsons Suction Catheter Gelato is an endo bronchial suction catheter with a non-traumatic tip
- The catheter is manufactured from non toxic medical grade PVC material
- It has an integrated ring type (Open End) flower shaped tip to minimize any mucosal damage
- The catheter is automatically centred during suction process due to its integral ring type design. This prevents any irritation to the tracheal mucosa & adds to patient comfort
- Four round lateral eyes facilitate efficient suctioning
- It is equipped with thumb control facility for efficient suction control
- The product is sterile, individually packed in a peel open soft blister pack
- The catheter is available in the sizes of 06FG, 08FG, 10FG, 12FG, 14FG, 16FG
- They come in a standard packing of 100 units per box
