We empower patients through better doctor-patient engagement and improved treatment compliance. Our platform enables clinics and hospitals to do the following:

- Telemedicine: Enabling online consultations without requiring APP at patients' end
- Queue management: Taking care of walk-ins patients while honoring scheduled appointments
- Patient communication & education: Appointment reminders, follow up reminders and wait time estimates are shared over WhatsApp and SMS. We also share relevant medical content via WhatsApp to help patients stay on track with their treatment.
- Automatic follow-up booking: Clinic staff can book follow-up appointment by 1-click on our Android/iOS App. Doctors love this feature as it improves their treatment compliance and patient base.
