## Description

When it is very cold the body focuses on just keeping the brain, heart and other vital organs functioning at a cost to the rest of the body. Hence, it is always recommended to maintain body temperature of patient during the treatment. The key features and benefits of this ICU Suit are listed below: ICU suit is made of smart fabric that reacts to environmental conditions and adjusts its resistance – thus in colder environments like ICU rooms, our suits helps to maintain body temperature ICU suit is sweat absorbent and is comfortable to wear in tropical weather The zippers are strategically placed on tops and bottoms to ensure easy accessibility to ECG Leads, Urine Catheters, Tubes, IVs, etc by doctors and healthcare staff without compromising the privacy of patients It is anti-bacterial treated and kills the bacteria; thus reduces the risk of cross-infections which is highest among ICU patients today It is anti-viral and kills the viruses including Human Coronavirus; thus protecting the patients against covid-19 viruses It is anti-bacterial treated and kills the bacteria; thus reduces the risk of cross-infections which is highest among ICU patients today The anti-bacterial efficacy remains for more than 60 commercial washes and the ICU suit has a long life ICU suit does not need special handling, and can be hand-washed / machine-washed The suit is extremely light-weight
