

KineQuantum

SKU: MP47761

Categories: [Health Innovations](#)

Short Description:

Virtual reality is the computer-generated simulation of a three-dimensional image or environment that can be interacted with in a seemingly real or physical way by a person using special electronic equipment, such as a helmet. We control each parameter of this virtual environment which allows us to create assessment and rehabilitation exercises for your patients : balance, spine, vestibular, or upper limb. [Learn More](#)

Virtual reality for physical therapy

Virtual reality is the computer-generated simulation of a three-dimensional image or environment

that can be interacted with in a seemingly real or physical way by a person using special electronic equipment, such as a helmet. We control each parameter of this virtual environment which allows us to create assessment and rehabilitation exercises for your patients : balance, spine, vestibular, or upper limb.
